

Week of March 5

- We will have a short lecture at 12:30pm on Tuesday to wrap up the discussions on transformer (30~40mins).
- You may start to schedule a meeting with me on after Wednesday to discuss the Final Project.
- You need to submit a 1-page proposal by 12:30pm on March 12, articulating your research problem, the data you plan to collect (or have collected), and the AI method you plan to use.
- You need to complete a (short, no more than 10 pages excluding references and appendices) research paper (with research question, data, and implementation).
- You will be judged by:
 - (20%) Research questions and methodologies;
 - (40%) Execution and results;
 - (30%) Presentation;
 - (10%) Writing of final paper.
- The paper should be either empirical or ML-methodological (unless with justifiable reasons).

Final Project

- Answer the following questions before working on your chosen project:
 - Why do I think this is an interesting research question to business/econ audience? Will I make methodological or empirical contributions?
 - Why do I think this data set is good enough for me to answer this question? How will my results depend on the outcomes of the data?
 - Am I using the cutting-edge AI/ML technologies to solve this problem? Why or why not?

Data Sets

- **CS Datasets:**
 - Kaggle
 - Packages
 - Papers that publish datasets
- **Econ Datasets:**
 - FOMC, 10-K, government contracting, census data, and other government datasets
 - Papers that publish datasets
- **Business Datasets:**
 - Published datasets from companies, such as Tmall, JD.COM, Tweet (X), Yelp and Reddit (most of them are on Kaggle)
 - Proprietary datasets
- **Other Datasets:**
 - Scraped data
 - Crypto
